

Project Title: ConnectUs

Document Title: User Stories

Version: v1.0.0

Date: February 25, 2026

Prepared By: SheBuilds

Executive Summary

ConnectUs is a two-sided marketplace platform connecting customers who need products with local runners who can shop for them. The platform features product photo uploads, runner availability calendars, AI-powered chatbot assistance, secure escrow payments, and hybrid delivery options. This document outlines the complete software development plan across 6 sprints, including 103 user stories across 6 epics.

Table of Contents

Contents

Epic 1: Booking	2
Epic 2: AI Chatbot	4
Epic 3: Mobile App	5
Epic 4: DevOps	7

Epic 1: Booking

Core booking functionality, calendar integration, and runner-customer matching

Story ID	User Story
US-BOOK-001	As a runner, I want to register and create a profile with my personal details so that I can offer my services on the platform
US-BOOK-002	As a customer, I want to register and create a profile so that I can book runners
US-BOOK-003	As a runner, I want to specify which product categories I offer so that customers know what I can source
US-BOOK-004	As a runner, I want to set my weekly recurring availability so that customers know my regular schedule
US-BOOK-005	As a runner, I want to block out specific dates when I'm unavailable so that I don't get booked during time off
US-BOOK-006	As a customer, I want to search for a product by name or category so that I find runners who can get it
US-BOOK-007	As a system, I want to display all runners who offer the searched product/category so that customers have choices
US-BOOK-008	As a customer, I want to filter search results by runner rating, distance, or price so that I find the best match
US-BOOK-009	As a customer, I want to view runner profiles with their ratings and product gallery so that I can make an informed choice
US-BOOK-010	As a customer, I want to view a runner's available time slots in a calendar view so that I can choose conveniently
US-BOOK-011	As a system, I want to prevent double-booking of the same time slot so that runners aren't overwhelmed
US-BOOK-012	As a customer, I want to create a booking request with product photo and details so that runner knows exactly what to get
US-BOOK-013	As a customer, I want to select a preferred date and time for my booking so that runner knows my schedule
US-BOOK-014	As a customer, I want to see a price estimate before confirming booking so that I know what to expect
US-BOOK-015	As a runner, I want to receive booking requests with full product details so that I can decide to accept or decline
US-BOOK-016	As a runner, I want to accept a booking request so that customer knows I'll handle it
US-BOOK-	As a runner, I want to decline a booking request with a reason so that customer

017	understands why
US-BOOK-018	As a customer, I want to receive notification when runner accepts or declines so that I know what to do next
US-BOOK-019	As a customer, I want to see my booking status (pending, accepted, declined, completed) so that I'm always informed
US-BOOK-020	As a runner, I want to update booking status during shopping (shopping, purchased, handed over) so that customer knows progress
US-BOOK-021	As a customer, I want to cancel a booking before runner accepts so that I'm not charged unnecessarily
US-BOOK-022	As a customer, I want to re-book with a previous runner easily so that I don't have to search again
US-BOOK-023	As a runner, I want to set max concurrent bookings per day so that I don't overcommit
US-BOOK-024	As a customer, I want to see how many bookings a runner has on a given day so that I know if they're busy
US-BOOK-025	As a customer, I want to upload multiple photos for complex products so that runner has complete visual information

Epic 1 Total: 25 user stories

Epic 2: AI Chatbot

AI-powered assistant for recommendations, FAQs, and smart booking assistance

Story ID	User Story
US-AI-001	As a customer, I want to chat with an AI assistant on the platform so that I can get help with my booking
US-AI-002	As a customer, I want the AI to recommend optimal booking slots based on runner availability so that I book at convenient times
US-AI-003	As a customer, I want to ask the AI "when is this runner available?" so that I get quick answers without checking calendar
US-AI-004	As a customer, I want the AI to answer FAQs about platform usage so that I don't need to contact support
US-AI-005	As a customer, I want the AI to suggest similar products if what I want is unavailable so that I have alternatives
US-AI-006	As a customer, I want to upload a photo and have AI identify the product so that I don't need to describe it
US-AI-007	As a customer, I want the AI to estimate price based on product photo so that I know budget before booking
US-AI-008	As a runner, I want AI to suggest substitute products when items are out of stock so that I can offer alternatives to customer
US-AI-009	As a customer, I want the AI to remember my preferences and past bookings so that recommendations get better over time
US-AI-010	As a customer, I want to ask the AI "what's the status of my booking?" so that I get quick updates
US-AI-011	As a customer, I want the AI to support multiple languages so that I can chat in my preferred language

Epic 2 Total: 11 User Stories

Epic 3: Mobile App

React Native mobile application for customers and runners

Story ID	User Story
US-MOB-001	As a user, I want to install the app from app stores so that I can access the platform on my phone
US-MOB-002	As a customer, I want to use my camera to take product photos so that I can capture exactly what I want
US-MOB-003	As a user, I want to log in and register via the mobile app so that I can access my account
US-MOB-004	As a customer, I want to search for products and view runners so that I can find what I need
US-MOB-005	As a customer, I want to create booking requests with photos so that I can order from my phone
US-MOB-006	As a user, I want to receive push notifications for booking updates so that I don't miss anything
US-MOB-007	As a customer, I want to see runner location on a map during delivery so that I know where they are
US-MOB-008	As a runner, I want to use GPS to navigate to store and customer so that I don't get lost
US-MOB-009	As a user, I want to log in with biometrics (fingerprint/face) so that access is quick and secure
US-MOB-010	As a user, I want the app to work offline for basic functions so that I can use it with poor connectivity
US-MOB-011	As a user, I want low data mode so that I don't use too much mobile data
US-MOB-012	As a runner, I want to scan barcodes to identify products so that I get exact matches
US-MOB-013	As a customer, I want to chat with AI assistant on mobile so that I get help anywhere
US-MOB-014	As a runner, I want to upload receipt photos via camera so that customer sees proof of purchase
US-MOB-015	As a customer, I want to view runner calendar and availability on mobile so that I can book on the go

Epic 3 Total: 15 User Stories

Epic 4: DevOps

Infrastructure, CI/CD, monitoring, and deployment automation

Story ID	User Story
US-DEV-001	As an admin, I want monitoring and alerts for system downtime so that issues are fixed quickly
US-DEV-002	As a developer, I want scalable cloud hosting configured so that system handles 1000+ users
US-DEV-011	As an admin, I want logs of all critical actions so that I can audit when needed
US-DEV-003	As a developer, I want staging environment that mirrors production so that testing is accurate
US-DEV-004	As a system, I want HTTPS and security headers configured so that data is protected
US-DEV-005	As an admin, I want performance monitoring to identify slow queries so that app stays fast
US-DEV-006	As a developer, I want automated testing before deployment so that bugs are caught early
US-DEV-007	As a developer, I want to deploy frontend to Vercel so that it's accessible to users
US-DEV-008	As a developer, I want to deploy backend to Render so that APIs are live
US-DEV-009	As a developer, I want to configure environment variables securely so that secrets are not exposed
US-DEV-010	As a developer, I want to set up logging with LogRocket or similar so that errors can be debugged
US-DEV-011	As an admin, I want usage analytics dashboard so that I understand platform growth
US-DEV-012	As a developer, I want to tag version v1.0.0 on main branch so that release is documented
US-DEV-013	As a developer, I want to set up Swagger/OpenAPI documentation so that APIs are documented
US-DEV-014	As a tester, I want test coverage reports generated in CI so that I know testing completeness

US-DEV-015	As a developer, I want to implement code quality gates with ESLint and Prettier so that code style is consistent
